EDUCATION

- **Bachelor Of Technology**: MVJ College of Engineering, Bengaluru   Expected 2023
- **Intermediate**: AVMD, Agra   2018-2019
- **High School**: St. Peter's College, Agra   2016-2017

SKILLS

- **Programming Language:** Java, SQL
- **Web Technologies:** HTML5, CSS3, Tailwind, JavaScript, Reactjs
- **Database:** MySQL, SQL
- **Miscellaneous Skills:** Highly Motivated, Strong Leadership, Excellent Communication Skills, Proof Reading Skills

PROJECT

Student Management System   Feb 2022 – Mar 2022

About: As a skilled web developer, I have created a student management system using HTML5, CSS3, MySQL, and Django. This web application allows users to effectively manage and monitor student data in a seamless and efficient manner. The application includes features such as adding and editing student information, tracking academic progress, generating reports, and managing administrative tasks. With its user-friendly interface and efficient design, this student management system is an essential tool for educational institutions seeking to improve their data management practices.

Mass Mail Dispatcher   Aug 2022 – Sept 2022

About: As a skilled web developer, I have created a web application that verifies valid and invalid email addresses using HTML5, CSS3, and JavaScript. This application offers a user-friendly interface that enables users to easily input email addresses and check their validity. The application is equipped with a robust validation algorithm, which analyzes the email addresses and provides quick feedback on their validity status. With its efficient design and functionality, this email verification tool is an essential resource for individuals and businesses looking to enhance their email communication strategies.

Meeting Scheduler Android Application (Academic Group Project)   May 2022 – July 2022

About: As a team member of an academic group project, I contributed to the development of an Android application utilizing XML, Java, and SQLite to schedule meetings on a designated date. The application's user interface was designed to provide a seamless user experience, with smooth transitions and easy navigation. The team exclusively utilized standard libraries to develop the application, and the data storage was managed efficiently with SQLite.

Internship And Experience

Web Developer

Exposys DataLabs   Aug 2022-Sept 2022

- I have designed and developed a sophisticated Mass Mail Dispatcher using HTML, CSS, and JavaScript. This email distribution platform offers users a range of customizable HTML templates, recipient management tools, and scheduling capabilities.
- The software tracks email delivery and open rates, providing businesses and organizations with valuable insights into the efficacy of their marketing campaigns. Overall, the mass mail dispatcher is a powerful and efficient communication tool for any organization.

Front-End Developer

Let's Grow More   Oct 2022-Nov 2022

- As a proficient web developer, I have designed and developed a responsive web application using create-react-app that features a user card grid layout accompanied by a navbar displaying a brand name. The navbar is equipped with a 'Get Users' button that initiates an API call to retrieve user data from https://reqres.in/api/users?page=1.
- To enhance user experience, the application includes a loader that displays while data is being fetched. Additionally, I utilized custom CSS/SASS/styled-components to produce a professional and visually pleasing design.

ACHIEVEMENTS

- Earned certificate for Responsive Web Design on freeCodeCamp
- Earned silver badge at Hacker Rank in Java
- Earned skill badge of Front-End Development on LinkedIn

DECLARATION

I hereby declare that the mentioned information is true and correct to the best of my knowledge and belief.
